

Museum Team visit to Norton's 5000 year old time capsule

This year's summer excavation by the Norton Community Archaeology Group is coming to an end, so today the museum team went to see what they have found.

Archaeology Officer Keith gives the Museum Team the guided tour

Archaeological Officer Keith points out a pit

It is a very interesting site, which Keith really brings to life. I would encourage those of you who are able to go along to the [Open Day](#) tomorrow and have a look for yourself. If you can't visit, Keith and other members of the Norton Group have been keeping a [blog](#) detailing the progress each day, and posting pictures of some of the finds.
